FREE ONLINE PREVIEW | IC Market Tracking Extrusion Machines Worldwide

During 2019-2022, there has been an increase in the global market for extrusion machines. Only the year 2020 was an exception to this trend in terms of quantity. Join us on the 31st of January for the presentation of the new IC Market Tracking and learn more about market features in context of main types of extrusion machines and application segments.

Our analyst, Julia Hrebenkova, will give a broad overview of the market development in 2022 and also present our preliminary forecast for the period 2023-2025.

When: 31st of January, 10am

Where: online
